

SMART FELT

QUIET BY DESIGN

COMFORT & AESTHETICS: SMART FELT SOLUTIONS

ACOUSTICS & TACTILE COMFORT

SMART FELT fundamentally redefines the acoustic environment. These panels effectively eliminate echo and drastically reduce ambient noise, fostering ideal conditions — whether for focused learning in schools, deep concentration in the workplace, or intimate conversations in restaurants.

ZONING & FUNCTIONALITY

Our solutions enable agile space management without the need for structural alterations. Mobile partitions and desktop screens deliver both visual and acoustic separation, making it easy to define private work zones within expansive, open-plan interiors.

UNIQUE DESIGN & PRACTICALITY

SMART FELT — offers endless design freedom. Advanced laser technology handles intricate patterns and custom corporate elements with flawless accuracy. Durable, dust-resistant, and remarkably easy to maintain — it preserves its pristine look over a lifetime of use.

UNLEASH YOUR IMAGINATION

THE SMART FELT color range is constantly evolving, with new shades added regularly to bring any interior vision to life. As our palette continues to grow, we recommend checking current color availability with your manager prior to placing your order — they'll be happy to guide you through the latest options

TECHNOLOGICAL FOUNDATION & TECHNICAL SPECIFICATIONS

SMART FELT — is a cutting-edge acoustic material for modern architecture. Produced from recycled polyester (PET), it offers a winning combination of eco-certification, hypoallergenic properties, and lasting resilience. The material’s open-cell structure ensures powerful sound absorption while enabling intricate, customized design patterns.

IMPORTANT NOTE :

SMART FELT is fully certified and complies with all safety standards of the Republic of Kazakhstan — including the stringent requirements for educational institutions.

KEY PARAMETERS	DESCRIPTION
MATERIAL COMPOSITION	100% RECYCLED POLYESTER (PET) FIBERS
THICKNESS	9 MM, 12 MM, 20 MM
SOUND ABSORPTION COEFFICIENT	NRC 0.45 – 0.85 (DEPENDING ON INSTALLATION TYPE)
FIRE CLASS	GROUP G1 (NON-COMBUSTIBLE)
MATERIAL DENSITY	1900 – 2400 Г/М²
